

Patient Name : SRISHTI CHAKRABORTY

Problem: Bed-wetting at night since last several years

Treatment since : 4-5 months.

My daughter Srishiti has been suffering from bed-wetting problems since the last several years. She is 11 years now and we were almost at the end of road. Tried out several ways to prevent bed-wetting but that was not working. Also she had a 'deep sleep' which was coming in the way of trying to get her to consciously wake up at night and visit the washroom. Since it's also the age where she was undergoing hormonal changes, it was very important to get rid of this problem.

I was consulting Dr. Mehra for gastric problem of mine and I happened to discuss this topic with him. He started his treatment ~~with~~ <sup>suggesting</sup> very methodical ways to be followed along with medication. We have been following the treatment since then and have received wonderful response. It's been last 3 months that she has not had this problem, which according to us is a big relief. While I'm taking further advice on the next course of action, I sincerely feel that this ~~is~~ <sup>is</sup> completely cured.

I strongly suggest anyone facing this issue to consult Dr. Mehra, anyone can see wonderful results.
