Taking Treatment for Fissure & started treatment for Dandruff & Hair fall

I had a problem during motion blood coming along with stool. I used to have this problem for two months i was unable to even sit in office also. When i visited this clinic i thought it would be very time taking to get it cured but after the first visit i got it cured to 60% in the first 15 days. now i am relieved from the ill ness by 95% and now i have joined to have treatment for hair fall and dandruff. Interaction with the doctor was good and suggestions and prescription of diet given by him was good i have tried to maintain the diet prescribed by doctor. The medical provider by the clinic was knowledgeable and increased one's awareness regarding the health. Thanks for the paramedical persons who has given the knowledge of medicines and the frequency of use.

Thanks & Regards

I. Vijay Kumar
