TAKING TREATMENT FOR COLD, COUGH, WHEEZING
& PSORIASIS

I have been suffering from cold, cough and wheezing since 2007. Apart from these, I was also suffering from a skin ailment psoriasis in toes. Under the treatment of Dr. Mehra I found a remarkable improvement in the above ailments. During the course of treatment I was advised to eat a healthy meal (home made) and follow certain do's and don't for my toes.

It was very painful in those days, but gradually with considerable time and patience, it started to be heal with Dr's treatment. This was all because I strongly and strictly followed the diet and other procedures as prescribed by the Dr. for better health and cure.

I advise the same to others.
