

SNORING..

Annu Banke.

Tel no. 

My husband was suffering from this problem for a long time, but it was very mild and tolerable. Suddenly, he started snoring so loudly, that I was unable to sleep because of it. I told Dr. Sunil Mehra, my problem. He asked us to get an x-ray of his nose. The x-ray was normal. So, we came to the conclusion that the snoring was either due to sinuses or because of obesity. Doctor, gave me medicine and told me to report back in 15 days. But within 7 days, I can see the difference in my husband's snoring. Now after 1 month it is almost 70% better.
