Kavita Menghrajani

My mother, Mrs. Kavita Menghrajani was suffering from an urinary tract infection. She neglected it initially and it worsened. Due to the urine infection she had high fever.

Dr. Mehra has been guiding us and taking care of us since the last 7-8 years now. It was thanks to his dedication and timely services that my mother was cured within 4-5 days considering her state and problem. He did not see the patient and considering this he did such a fantastic job.

There were times when I needed his help at odd hours to tackle the fever and despite of his hectic schedule or his personal time he helped me out. I can't thank him enough for the care, love, support, guidance and patience with which he continues to solve our problems. I would also like to thank Mr. Raju Yadav for rendering his support.

Regards,
Sharmila Menghrajani
(Patient's daughter).
