

Chronic Bronchitis

DATE 5 9 09

TIYA JASPAL

My child developed Chronic Bronchitis since she was six months old & we were not even aware what the problem was. Even slight change in weather would take away our happiness & Tiya would fall sick with a prolonged recovery period. Till she was 1 1/2 this continued & we were really worried about her health. My co-sister told us about Dr. Mehra & his magic. Since the time Tiya is ^{being} getting treated by him Dr. Mehra Tiya has not only recovered but seldom fall sick. From the very first month of treatment we could see her recover & from the second month onwards other kids would fall sick but Tiya would still be healthy despite of the weather change. It has been six months now & so far Tiya has not fallen sick with the magnitude which used to be earlier. One thing which I understood is that if I call the Dr. timely as soon as there is any symptom of cold & cough he will take his magic wand & protect my daughter from falling sick. We were visiting one of the best Allopathic doctor in town but Tiya would keep falling sick. My trust in homeopathy has increased I don't know whether it is homeopathy alone which works. My belief is that it is Dr. Mehra's homeopathic treatment & his sincerity which works. My daughter was a fussy eater as well she would not eat food for days. Dr Mehra gave me diet plan to follow & see how things will change. To be honest I could not completely follow it but with slight modifications itself which Doctor had

see below Next page

suggested there was a drastic improvement in her appetite. We are very grateful to doctor & recommend every advice given by the doctor should be followed blindly. "Pay a doctor who talks about maintenance of health rather than just curing" & Dr. Mehra is the only doctor I truly feel like paying.... "He is a magic"

Thanks Doctor.
Harvinder &
Ankita Jaspal.
