

Saanvi Nadkarni

Tel No

Disease - hyperactive airway trachea

I am Snehal Nadkarni mother of Saanvi Nadkarni. Before writing my feedback I would really like to thank Dr. Mehta for treating my child so well.

Like as human beings always probably know what's right and wrong. But I guess we never follow till we learn our lesson or probably burn our hands. Even if we follow 70% of what we think is right and also proven right I guess we all will do well in our own lives.

What happens when you come to Doctor Mehta. The right that you know is either confirmed right and gets separated from wrong or stands out completely wrong. You suddenly get your mother back who watches your routine and points out the flaws in your routine. I thank you Doctor for being so strict with diet charts cause I have seen the difference in my daughter how she was and how she is.

The best thing that I can give my daughter today is the best of her health and doctor has showed me a way how to do that. With sound health and I believe best things will follow her.

I sincerely appreciate the services offered during the tough times when all panicky moms start calling docs like a mad dog. And I am no different.

Dr. Mehta has always suggested to my m/s to wait to start any medication.

Also homeopathy proves the proverb
"Slow and steady wins the race"

I appreciate Doctors knowledge not only about the Medical background but about the way of living. Sometimes for patients like me its not important to understand how a body functions biologically but how can I run it smoothly without much complexities in life.

Me and my family would like to thank you from the bottom of our heart for showing us the healthy way of life.

Thank you

Snehal Nadkarni
