

## Chronic Bronchitis.

PAGE NO. 72  
18/6/87

cold cough fever, diarrhoea (Small children)  
Tysti Singh

Duration of illness - about 3 yrs.

Duration of treatment -  $1\frac{1}{2}$  yr.

% of recovery - Completely

My daughter Yubth who is now  $7\frac{1}{2}$  yr had been suffering from severe cold and cough somewhere equal to bronchitis. I had been to several allopathic doctors, but the ailment instead of curing, intensified. But after starting homeopathic treatment and strict prohibitions on diet and other things as told by the doctor, my daughter is now completely cured. Initially the procedure was slow. But with repeated consolation from doctor and faith in him and God, now my daughter is leading a normal life and is ~~off~~ now not on any type of medication.

My son who is ~~not~~ now 20 month old is also under homeopathic medicine. He had been seriously ill several times but till date apart from cough I had not given him any antibiotic or allopathic medicine.

The telephone service given by the doctor to the patient is of immense help. Along with the stock medicine, the

telephone service which is given to the patient by the doctor at any time, helps in treating the patient without taking pain of running here and there at the time of emergency.

Keep faith in Doctor and God for your cure.
