name: Anshu Bishnoi

Mother of Shaurya (patient)

Tel [REDACTED]

Disease: Chronic Bronchitis

Duration: 3 years

Aggravation: 1 year

Duration of Treatment: 3 years

My son Shaurya Bhadr was 3 years old when he first came to Dr. Mehra. It was painful and at the same time disheartening to see my only child catch cough, cold & wheezing at the slightest, & no provocation. Our personal life was being affected because health of the kid left no chance at weekends to enjoy time or outings.

The response started very slowly at first since he had enough antibiotics in first three years of his life. There were times when again we were back to square one & even used allopathic medicines in emergency with Dr. Mehra's approval.

Slowly after 6 months what we got was a blissful response.

Now my son is absolutely normal. No cough, cold, fever even in worst weather conditions.

The patients should understand a slow initial response might come & during that period don't lose your faith in Dr.
