

CHRONIC BRONCHITIS

ZION D'SOUZA

Tel No. [REDACTED]

My son Zion was suffering from cold and cough for along time. Every month we had a visit to the doctor for his cold, cough and fever.

We got to know about Dr. Mehra from my relatives and immediately got my son here.

Doctor took time explained to us many things which weren't aware of. He explained the importance of fruits which we rarely eat. He explained how eating junk food impacts us. He explained the manner in which we should consume food. He asked us to prepare a diet chart for Zion and we strictly followed his instructions. Initially it was very difficult to follow and maintain a creased of the diet chart. But as months passed it became a habit for us.

We follow the diet chart and feed my son according to that.

There was alot of improvement in Zion he hardly got cold in these 5 months of treatment. Nearly 90% improvement we got just by following doctors advise religiously. Maintaining diet chart and taking medicines as advised.

Doctor is always available whenever we needed him. And his personal care made us feel important and cared for.

NEXT PAGE.

We understood why doctor had given us
do's and don'ts.

Doctor doesn't only treat you
but adds value and explains the
reasoning behind each and every
aspect.

I'm really grateful to doctor for
trusting my baby. I thank doctor
for treating; guiding me to make
sure whatever my baby eats is
healthy which will not only help
now but later as well.

Thanks again doctor.
