

Sidhraj - Vinje

My 18 half year old son suffered from cold too often. My husband & I realised that even allopathic treatment had become ineffective lately, also he did not like having those syrups. Hence, we came to Dr. Sumi Mehra for a homeopathic treatment.

One of the best thing we observed is that Dr. has helped us improve Sidhraj's diet. He has started eating healthy food in good quantity. Yes, of course his cold has also reduced drastically & cough is no more there. We had no problem giving him the homeopathy medicine. I am sure several tips of dos and don'ts regarding maintaining good health will ~~help~~ help him as well as all of us throughout our life.

I recall one incident when Sidhraj had high fever, doctor told us on phone what medicine is to be given. The fever went, however it recurred after sometime and this continued for 5 days. On day 4 we were worried & asked doctor whether we could do any test but he kept calm and asked us not to worry. So we trusted him and followed his instruction. He got measles on the next day and got cured in another 3 days. The doctor has guided us well, informing us what to expect before hand and how to react. It is only because of this that the

duration of fever & measles past smoothly without much trouble to the baby or us.

Dr. Sunil Mehra is very approachable on phone and takes timely feedback. He had asked me to give him an update on Siddharaj's fever every 6 hours. On the ^{2nd} day when I did not call him in the night as his fever was gone, doctor himself called me at 10:15 pm as he got worried ~~about~~ for Siddharaj's health.

We are happy that we came to Dr. Sunil Mehra. He guides you like no other doctor. We could ask him any question regarding health and good living. He not only ensures we get well soon but also stay cured and healthy.
