NEELABH GOENKA

B/O SWATI GOENKA

My son (Neelabh) used to fall sick almost every 15 days due to some reason or other, cold, cough, fever etc. This impacted his mental & physical development as early years of growth are very critical, he being an infant. Basically low on immunity, it was getting difficult to cope up.

Under Dr. Mehra, initially following him was difficult but his concern for my child gave me faith 'n' courage to follow him. I sincerely followed his advice. He was always available on phone (I remember calling up at odd hours like 3'o'clock in morning') & he showed back when he could.

My son's health improved slowly & I realised how important is diet in one's life. He attended me during critical times even when the clinic was closed, or when he was out of town. The compounder's always passed on my message.

I learnt a lot and hope many others also benefit from my learning. When I see my son now, his health is much better, immunity much improved and I feel happy as a mother to give him the best service available in the form of his doctor.

Swati Goenka.
