Illness - Enlargement of adenoids

In May 2012, my daughter was detected with the problem of enlarged adenoids. We have initially been to an allopathy doctor (ENT specialist) who had recommended immediate operation.

However since my daughter was only 8 years old, we were really afraid to take a decision of getting her operated. When I discussed this matter with my office senior manager, she advised me to visit Dr. Sunil Mehra.

On 12<sup>th</sup> May 2012, we had a first visit to doctor and since then we have been judiciously following his instructions.

In the month of November 12, Dr. has advised to get the x-ray done and we were happy to know that there was a major improvement.

First of all I would like to thank Dr. for helping us to cure our daughter from this ailment and thereby avoiding so called critical operation suggested by ENT specialist for such a small child.

Thanks Dr.

From Dhriti

Illness - Migraine

I was suffering from migraine since 10 years. This pain I used to get migraine pain attacks at least 15 to 18 times a month. Sometimes the pain was very critical and used to last for 2 to 3 days continuously.

I was really helpless with this pain since I have tried each and every possibility to get myself treated with this pain and there was no improvement at all.

From the day I have started my treatment with Dr. Sunil Mehra, I am happy to say that 75% of my migraine problem has been cured.

I am confident that if I continue with Dr's medicines and instructions, my migraine pain will get cured 100%.

Messages for the readers -

Trust doctor & have faith in him.  
Follow his instructions -

Be patient, since homeopathy cures the ailment from the roots. Next page
