Hi To everyone who might be reading my feedback or so called experience with Dr. Sunil's Clinic.

I have been suffering with Chronic Allergic disorder since my Engg. (10 years back) and I have tried all possible ways to get rid of it. I started with Allopathy then ayurvedha and even homeopathy for more than 4 years and found no result with great disappointment. I have given up the hope and use to take Citrizine tablet when ever required, and was doing so since 4-5 years. before I came across Dr Sunil's clinic.

For initial couple of visits didn't change my opinion about this allergy by as days passed and slowly I am able to identify change in my behaviour. (something positive) These are the few things that I noticed which made difference here at this Clinic.

- ① Any disease can be cured and its all in the hands of the Patient alone.
- ② Dr. is just a Guide and can show you the way.
- ③ Hope and belief in you and Dr. is very Important.
- ④ Your diet is your future.

Apart from this. there are many instances which I came across and experienced all throughout this course of time
next page.

I first visited this Clinic in May-2013
and its almost 2 years till date and
I confidently say that I have recovered
80% from that illness.

Now I am very free from that disease
to a major extent and very happy and
also confident that I will recover
100% very soon.

once again Thanks to Dr Sunil and Team
for making my dream true sooner.

Yrds -

Venkat.
