

Shikender Kumar,

In the year 2003 I was suffering from fistula and I undergone surgery. After surgery it was not completely killed and doctor suggested me once again we have to operate, But my family not ready to do the surgery, then my father suggested to take homeopathy medicine. After taking homeopathy medicine for 6 months I was completely OK, But in the year 2008 once again I started feeling immense pain at the time of stool and sometime blood also, Then I visited Dr. Samil Mehra Clinic without any reference because that time I was new in Mumbai City, I told my problem to the Doctor and he told me you are caught up with fissure disease.

I started taking medicine and controlled my food which suggested by Doctor. I surprised Dr. Samil Mehra told me about diet which so far I come across no doctor told me.

Sir is very nice, cordial and very caring nature he have, he calls personally and enquire the health of the patient.

His knowledge about fruits and its application is wonderful. His staffs are very good, Now I am completely OK means 100% OK.

For the purpose of my writing this because faith on homeopathy and Doctor attention on patient is amazing.

Sir my heartiest regard to you.
One more thing I would like to add

NEXT PAGEShikender
Kumar

Sir, advise me regarding my diet which I feel personally no doctor told me till today systematically. Once again I congratulate regard his way of treatment.

Thanks Sir,

Shantendra Kumar.
