

Name: MRS. ELVINA KUMBHARDEKARTEL NO [REDACTED]

Name of disease - Gall stone.

Duration - 5 months

Percentage of Recovery - 100%

For more than 7-8 ~~month~~ years, I was suffering from diarrhea, everyday, I thought it may be ~~some~~ menopausal symptoms as told to me by my Physicians, I tried many allopathy medicines, but nothing helped, when I did a sonography, then it was detected that I had gall stone, and this was one of the reason for my constant diarrhea. My sister-in-law recommended me to dr. Mehera, and I came to meet him. He had prescribed medicine to me saying this will clean my bowel system. I tried, the first 15 days was very hard for me as I use to get loose (watery motions) but slowly & steadily my motions stopped and I took the dr. advice very seriously, his diet & medicine was very fruitful in curing my problem. After so many years now my motion is normal, I am feeling energetic & the stress I used to have every morning ~~at all~~ has stopped.

I strongly recommend everybody to undergo not only his medicine but also his advice and diet!
