

① Rt feet ankle sprain due to pitfall.

② Left knee joint (Cyst)

Venkat Balan.

I was an old patient of Dr. Sunil, undergoing treatment for BP. During this period, I had a pitfall (fell inside a pit 4 feet deep) which left me with a sprained ankle. Also, was unable to fold my left knee (had developed a cyst as analysed by an orthopaedic surgeon). I approached Dr. Sunil with these problems and was very confident of a permanent cure having experienced the same with my BP issue.

I must add here that my prior experiences with sprains in the ankle, had been that they last for a long time (more than a year) and sometimes for ever. I didn't want that to happen this time and hence decided to completely follow and adhere to Doctor's advises/courses.

My left knee joint cyst problem was a one-off unique kind, as given to understand. Dr. Sunil was very understanding and took all efforts to prescribe an apt medicine and routine to be followed.

Having undergone this treatment for about a month, I am 100% cured of the above problems. I am able to bend my knee comfortably and twist my right ankle, as need be.

All this has been possible due to the conscious efforts, knowledge and advises provided by Dr. Sunil.

I am confident and would now feel free to approach Dr. for any problems I may face in future. I would suggest the same to all co-patients to ~~approach~~ unhesitatingly do so.

Thank you Dr. Sunil

Venkat
