Pooja Mehta

My name is Pooja. I am basically from Karnataka. I am here for a job since 1 and 1/2 years. I came to know about this doctor through internet.

I was not very sure whether I had to trust someone whom I never heard of.

Finally I decided to call up the doctor as my disease was increasing day by day.

(Psoriasis) As I had this on my eyes, it really started looking very pathetic, so I took it very seriously and approached this doctor.

On the very first day of my visit, he asked me all my problems and gave me a good confidence saying that I will be 100% alright only if I agree or follow the instructions given to him. Since we are outsiders, we never care of our food habits and always tend to eat the junk food in hotels which is unavoidable. But the doctor insisted me to eat only those food items which are not harmful for health & I followed it strictly.

Even though I tend to forget my tablets in the beginning later on I got very use to it. Its just that I started my treatment for about two and half months before but the outcome was too fast. Now I am almost 80% cured and my face is clear.

Next page

Now on I started a treatment for my black spots on my face, which are almost 45 in count. Doctor has assured me to make my face clear as early as possible. I have decided to follow his advise and get well soon. Soon I will write another feedback.

Thanks doctor for treating me and giving me confidence.

Thanks.

Pooja Mehta
