Duration of Illness $\Rightarrow$ Almost 1 yr

Span of Treatment $\Rightarrow$ 6 months

Recovery $\Rightarrow$ almost 98%.

I had Acne spots as I had a habit of bursting boils on my face because of which I was actually facing lots of problems later on. I started getting more boils as compared the previous ones. I tried many facial creams but none of them actually worked. As I never trusted HOMEOPATHY from the start I was not willing to consult Dr. Sunil Mehra but somehow after course of about two months I was convinced with his treatments which actually cured the problems. Its a fact that it is ~~be~~ Psycho Psychologically fixed in our minds that ~~not~~ homeopathy does not have any end to its treatment, but. It is actually not so it is just that we the patients are not patient (do have patience). If we can wait for almost 4 weeks for the creams to effect and then changes on our skins chemically then why not try waiting for a span of 4 months or so to see a change naturally (without any so-called side effects). We generally want things to go fast but in this kind of treatment the procedure is slow but the result is SURE AND SAFE.

So finally I just conclude saying you may not be convinced by his words & talks but I am sure you will be convinced by his treatments & its results.

So please strictly obey the doctors instructions and see the change in yourself & your health.

PLEASE BE PATIENT WITH HIM.
