

Atopic Dermatitis & Slip disc
Tejbala Isidhar
Tel. NO. [REDACTED] 13/10/06

My son was suffering from a skin allergy when he was around 3 yrs. After trying allopathy for about a year and a half I brought him to Dr. Mehra for treatment. He was under his care for about 3-4 yrs. Now he is completely alright. During the treatment period we went through periods of high & low. There were times when I thought of quitting thinking the medicines were not helping him. But Dr. put in a lot of care and efforts in treating him. During times when he got the allergic attack Dr. would explain the reason & instill confidence in us. My family had full faith in him. He gave us his sincere services at odd hours. He was always there as a friend.

A year back I suffered slip disc. He advised me a months bed rest. A couple of times he came for house visits. Along with his medicines he suggested exercises, yoga and acupuncture. With such a treatment I was out of bed in 3 weeks time. He recommended continuing walks, exercises to keep my back fit.

Along with his medicines his suggestions regarding diet is the highlight of his treatment. His sincere service and concern for his patients is what brings my family to him in case of any ailment.
