

Atopic Dermatitis

Chronic Sinusitis 21/6/2014

Neeraj Jain Tel No [REDACTED]

I am suffering from Sinusitis since my memory goes back. May be from Age of 10 yrs. Now I am 41 yrs Old. So you can say I have lived my life so far with this problem. I had tried all sort of medicine be it Ayurvedic, homeopathic or so called "Modern" medicines, but no relief. Only temporary relief that too if I took these medicine for 10-15 days, next 10-15 days are normal. Well I started taking Sinusitis as part of my life and thought that it will be their till I die. In Mid Aug/2013 one taxi driver "Anirudh" told me about Dr. Sunil and his success story which he had experienced. I thought that let me also give a try to this Dr. and started consulting from Sept/2013. It has been almost a months since I started taking medicine, advice, guidance from Dr. Sunil. To day I can say my disease is ~~almost~~ cured 75% and I am 100% sure that I will get rid off this problem in coming 3-4 months. One thing I would like to confess that had I followed Dr-Sunil's advice and medicine pattern 100%, I would have cured full by now. His way of treatment is unique. Minimum medicines, maximum attention on your day to day diet. I think our all problems (health related) can be cured and we can be disease free, if we follow Dr. Sunil's advice and diet pattern. According to him if you deviate from your normal diet (as suggested by Dr.) immediately your health will get affected. I have experienced the same. Now whenever I take (say sweets, tea outside food which is strictly "NO NO" as per Dr.) within 12-24 hrs, my problem reoccurs. What I feel if somebody wants to be healthy, he/she needs to follow (STRICTLY) Dr. Sunil Mehra's advice, Miracle will happen. Atleast my experience is like that. The best part of the prescription of Dr-Sunil is he ask us to do very very basic and simple things. His believe is that any disease can be cured by following strict diet pattern, no matter how old the disease is. And I found his way of treatment extremely effective and practical too.

The same success I have experienced in case of my son (Now 14 yrs old)
Next page

He has black spots on both his legs since birth. ~~But~~ I have tried all sort of medicines but no change. No doctor was able to tell me why these spots are there and when it will be cured. Then I started his treatment from Dr. Sunil. In case of my son also, with 8-9 months of treatment, 50% relief. And I am 100% sure that within next 6 month, my son will be free of these black spots.

Some patients may find Dr. Sunil's treatment little expensive. But I think his fees is an investment in our health and not medical expenditure. Because Dr. Sunil believes in eradicating the leages from roots and not just temporary relief. Some patients find his treatment "time taking". But we need to understand that if some body is suffering from say 10-15 yrs, the cure is not possible within a month or two. Older the disease, longer the treatment will be. So have patience, have full faith in Dr. Sunil Mahraya, you are in safe hands. Rest assure, you will be cured 100%. Time taken in getting 100% cured will depend upon the involvement of patients. More you involve in treatment, better response you will get. Remember, even if you do not follow Dr. Sunil's instructions, you will be cured. But the time taking may be bit long. And once Dr. Sunil say that now do not take any medicine, and you continue to follow his advice regarding diet pattern, you will never suffer with that disease.

Dr. Sunil
