Slip disc.

Sandeep Shrivastav

I had slip disc at L4-5 four years back and had got it operated but it re-occurred after 4 years again. MRI showed the slip disc at same place.

I suffered with numbness on left leg for 2 months after the re-occurrence and then we got the reference of Dr Sahib.

His meticulous approach towards treatment of Disease from Root is excellent. He put me on "COMPLETE BED REST". With his personal visits and help of Accupressure, I am today able to walk and do not have any numbness.

All this within One Month of his treatment.

I wish to mention that if I were aware earlier that Homeopathy can cure this disease I would not have got it operated. Homeopathy - works on such disease and ^{can} completely cure it.

System adopted by Dr Sahib is very good, fair and transparent. He is aware of accupressure himself and treats (sometimes). He suggested Exercises which are very helpful in building Back muscles.

I have complete faith in his approach & have followed his every word of advice (which is very good for patient).

Dr Sahib is very particular about helping us in improving our health with our cooperation and if we can do what he asks us to do

we can control our health.

He has got good grip of Slip Disc and has sure treatment of it.

Pls. Adopt Homeopathy & do not get it operated. Homeopathy with Dr's help of Rest, Accupressure & his Medicine, Can be completely cured.

Thanks/
